FISCAL IMPACT STATEMENT

LS 6355

BILL NUMBER: SB 361

NOTE PREPARED: Jan 2, 2012

BILL AMENDED:

SUBJECT: State Provision and Use of Communications Service.

FIRST AUTHOR: Sen. Merritt

FIRST SPONSOR:

BILL STATUS: As Introduced

**FUNDS AFFECTED: GENERAL
 DEDICATED
 FEDERAL**

IMPACT: State

Summary of Legislation: This bill provides that after March 31, 2012, the state may not offer or provide, directly or indirectly, communications service to the public or to any private or governmental entity. It provides exceptions to this prohibition to allow for the following:

- (1) The state to provide communications service for 911 services or emergency or law enforcement purposes.
- (2) The state to provide communications service to institutions of higher education for the direct benefit of students, faculty, and staff.
- (3) The state to purchase communications service through a contract administered through the Indiana Department of Administration.
- (4) The state or a private postsecondary educational institution to purchase communications service from a provider owned or operated by, or affiliated with, the state if comparable service is not available from a private provider.

The bill provides that after March 31, 2012, a person that is not: (1) a state educational institution; or (2) a private postsecondary educational institution; may not become a member of the I-Light network or use the I-Light network or any services made available through I-Light.

Effective Date: Upon passage.

Explanation of State Expenditures:

Explanation of State Revenues: *I-Light Network:* This bill provides that after March 31, 2012, a person that is not a state educational institution or a private postsecondary educational institution may not become a member of the I-Light network or otherwise connect to or use the I-Light network or any services made available through I-Light. (Note: The bill allows noneducational institutions that are members of the I-Light

network *prior* to April, 1, 2012, to still connect or use the I-Light network.)

The I-Light network is funded through appropriations from the General Assembly as well as connection fees paid by members to connect to the network. Under a current memorandum of understanding that exists between the state and the universities, some Indiana non-higher education institutions may be eligible for connections to the I-Light network where they have research and developmental relationships with one or more Indiana universities. To the extent that this bill limits the use of the I-Light network only to postsecondary institutions, revenue from connection fees could decrease.

Background Information: The I-Light network is a high-speed communications network that connects state educational institutions and private postsecondary educational institutions throughout Indiana. PL 229-2011 appropriated a total of \$2.94 M for FY 2012 and FY 2013 for I-Light network operations.

Explanation of Local Expenditures:

Explanation of Local Revenues:

State Agencies Affected: I-Light Network; Indiana University; Purdue University.
