The one-time costs associated with the bill will increase the unfunded actuarial liability by a corresponding amount.

**Explanation of State Expenditures:** *Pre-1996 TRF:* For the Pre-1996 TRF Fund, there will be a one-time payment of \$19.3 M in FY 2014, resulting in 47,000 retirees, beneficiaries, and survivors belonging to the Pre-1996 Fund receiving a one-time average payment of \$411. The Pre-1996 Fund is paid for through

appropriations from the state General Fund and payments from the Pension Stabilization Fund.

*State PERF:* One-time 13<sup>th</sup> check payments for all state PERF retirees, beneficiaries, and survivors would total \$8.4 M in FY 2014, resulting in 24,331 state PERF retirees, beneficiaries, and survivors receiving an average one-time payment of \$346. Increases to the state PERF annual employer contribution rate due to this provision would be reflected in contribution rates beginning in FY 2015.

*C&E:* One-time 13<sup>th</sup> check payments for C&E Fund retirees, beneficiaries, and survivors would total \$65,000 in FY 2014, resulting in 187 C&E members who would receive an average one-time payment of \$348. *Definitions- Thirteenth Check:* A 13<sup>th</sup> check is an annual supplemental retirement allowance arising from earnings on the investments of a system in excess of those determined as needed for other purposes. Unlike a cost-of-living adjustment (COLA), the amount of this supplemental retirement allowance does not increase the pension base.

*Unfunded Actuarial Liability:* The actuarial liability, sometimes called the unfunded liability, of a retirement system at any time is the excess of its actuarial liability at that time over the value of its cash and investments.
