FISCAL IMPACT STATEMENT

LS 6472

BILL NUMBER: SB 338

NOTE PREPARED: May 1, 2013

BILL AMENDED: Apr 26, 2013

SUBJECT: Absenteeism; School Improvement Plans.

FIRST AUTHOR: Sen. Kruse

FIRST SPONSOR: Rep. Behning

BILL STATUS: Enrolled

FUNDS AFFECTED: **GENERAL**
 DEDICATED
 FEDERAL

IMPACT: State & Local

Summary of Legislation: This bill has the following provisions:

Absenteeism: The bill requires the Department of Education (DOE) to provide resources and guidance to school corporations concerning evidence-based practices and effective strategies to reduce absenteeism. It makes changes to the definition of: (1) chronic absenteeism; and (2) habitual truant. It requires school corporations and schools to identify contributing factors to absenteeism and to develop chronic absence reduction plans. It provides that a school corporation must include the number of students who are habitually truant in the school corporation's annual performance report.

Commission on Education Study Committee: The bill refers issues related to absenteeism to the Commission on Education Study Committee.

High Performing Schools: The bill provides that a school that is designated in the top category or designation of school improvement in the year immediately preceding a year in which the school's strategic and continuous school improvement plan (plan) initially goes into effect is not required to include certain achievement objectives or components in the school's plan.

Conforming Amendments: The bill also makes conforming amendments.

Effective Date: Upon Passage; July 1, 2013; July 1, 2014

Explanation of State Expenditures: *Absenteeism:* The bill's requirements are within DOE's routine administrative functions and should be able to be implemented with no additional appropriations, assuming near

customary agency staffing and resource levels.

Under the bill, DOE would be required to make absenteeism a priority, to direct school corporations and schools to identify contributing factors of absenteeism, and to develop programs to reduce it. As part of this effort, DOE would provide to school corporations and schools, resources and guidance on evidence based practices and effective strategies that reduce absenteeism in schools.

Commission on Education Study Committee: The bill refers issues related to absenteeism to the Commission on Education Study Committee. If the committee were to hold additional meetings to address these issues, there would be additional expenditures for legislator per diem and travel reimbursement for the committee members. Any additional expenditures must be within the committee's budget, which is established by the Legislative Council.

The bill requires the committee to study the following issues:

- (1) The development of definitions of excused and unexcused absences from school.
- (2) The effectiveness of voluntary agreements between school corporations and courts having juvenile jurisdiction in providing court supervised educational programs, alternative programs, or diversion programs for students who are habitually truant, suspended, or expelled from school, including: (a) the number and types of agreements and programs in Indiana; (b) the effects of these programs on parents and students; and (c) the success of the programs in reintegrating students into the classroom.
- (3) Evidence based practices and model programs for reducing absenteeism and supporting student engagement and achievement.
- (4) The feasibility of modifying Temporary Assistance for Needy Families (TANF) program eligibility for households to include school requirements for students.
- (5) Any other issues related to student absenteeism.

Explanation of State Revenues:

Explanation of Local Expenditures: *Absenteeism:* School corporations and schools should be able to accomplish this task within existing resources.

School corporations and schools, under the direction of DOE, would have to identify contributing factors of absenteeism and develop programs to reduce it. These plans and programs would be incorporated in the continuous school improvement plans of corporations and schools. In particular, the continuous improvement plan must address how the corporation or school would educate students who are chronically absent or habitually truant.

Corporations must include the number of students who are habitually truant in their annual performance report.

High Performing Schools: The fiscal impact would depend on whether the school would achieve the same academic designation with or without the strategic and continuous improvement plan. If the school would achieve the same designation, this would suggest that the plan itself was not essential and the school could save on the administrative cost of developing it.

Based on 2012 academic performance data from the DOE, approximately 845 public and non-public schools would qualify under this provision.

Under the bill, high performing schools would not be permitted to waive rules that relate to the health or safety of students or school personnel, special education rules, or applicable federal statutes or regulations.

Additional Information:

Absenteeism: Current law defines both chronic absenteeism and habitual truancy as being absent from school for more than 10 days within a school year without being excused. This bill, however, redefines both conditions and has a more stringent standard for chronic absenteeism. Chronic absenteeism is defined as being absent from school for 10% or more of the school year (18 days minimum for a 180-day school year) for any reason; habitual truancy, under the bill, is defined as being absent 10 days or more within a school year without being excused or without being absent under a parental request that has been filed with the school.

High Performing Schools-Strategic and Continuous Improvement Plan: Under current law, each school has to develop a three year continuous school improvement and achievement plan. The plan must state objectives for the school to achieve in the following areas: (1) attendance rate; (2) the percentage of students meeting academic standards under the ISTEP program; and (3) for a secondary school, the graduation rate.

The plan must contain the following components for the school: (1) a list of the statutes and rules that the school wishes to have suspended from operations for the school; (2) a description of the curriculum; (3) a description and name of the assessments that will be used in the school in addition to ISTEP program assessments; (4) a provision to maximize parental participation in the school; (5) a provision to maintain a safe and disciplined learning environment for students and teachers; (6) a provision for the coordination of technology initiatives and ongoing professional development activities. Additionally, for a secondary school, the plan must include a provision to offer courses leading to a honors diploma or Core 40 diploma and to encourage students to enroll in them.

The plan must also address the learning needs of all students, including programs and services for exceptional learners. It must specify how and to what extent the school expects to make continuous improvement in all areas of the education system where results are measured by setting benchmarks for progress on an individual school basis. It must also note specific areas where improvement is needed immediately.

Explanation of Local Revenues:

State Agencies Affected: Department of Education

Local Agencies Affected: School corporations; Public schools; Nonpublic accredited schools.
